

Machining Technician Apprenticeship

at Econ Engineering

Apprenticeship: | Level 3 Machining Technician Apprenticeship

Employer: | Econ Engineering Ltd

Apprenticeship Provider: | Middlesbrough College

ECON

We're offering the opportunity to do an apprenticeship as a Machining Technician.

The Opportunity:

This is your chance to earn while you learn, working 4 days a week with Econ Engineering while studying one day a week at Middlesbrough College to gain a Level 3 Machining Technician Apprenticeship. At Econ, you will part of the team contributing to the production of our recognisable gritter and tipper body range. At Middlesbrough College, you will receive teaching and will complete practical tasks and examinations.

This opportunity allows you to gain hands on experience working in a manufacturing environment at a well-established company. You will be learning to do things like read and understand engineering drawings and use them to machine parts on machines such as lathes, milling machines, grinding machines, and CNC tools. You may then progress onto learning how to program CNC machines from scratch.

Course Entry Requirements:

You must have achieved GCSE English language and maths at grade 4 or above, or Functional Skills Level 2.
